

CST Basic Elements 2

NEW! November 15-17 - [Fredericton, New Brunswick, Canada](#) at the Fredericton Inn, 1315 Regent St., E3C 1A1 (Room rate \$119, contact the Inn directly)

Instructor: Gary Keeling, BPE, BSc (PT), CSTA-CP-I

BE2: The Cranium

18 CEUs, \$498, No pre-requisite required: BE1 or equivalent training

This three-day class is a continuation of fundamental aspects of craniosacral therapy and builds on knowledge and applications learned in BE1, now focusing on the cranium and intracranial membranes. These topics will be discussed:

- anatomy, palpation and treatment methodology of the cranial vault
- meningeal membranes, cranial nerves
- use of the cranial bones as handles to manually influence the fluid dynamics and reciprocal tension mechanisms of the craniosacral system
- relationship of prominent facial bones to the cranial vault

The attending student--combining knowledge and skills acquired in this class and BE1--will be able to do a more thorough assessment of the craniosacral system and facilitate therapeutic change in the intracranial membranes that surround the central nervous system.

Registration Fee: \$498 U.S. (A \$200 deposit is required with registration.)

Canada: CMTNB 9.5 Category A CEUs and MTANS Approved for 10 Primary Units

Prerequisite: BE1 or equivalent training
